Preface	xiii
Acknowledgments	xix
Chapter 1: Preliminaries	1
<i>Exploring the Database</i>	2
How do I get an overview of the database?	2
How do I get a dictionary for a table?	4
How do I identify the indexes for a table?	6
How do I find the constraints for a table?	8
<i>Query Standards</i>	10
How do I format a query?	10
How do I make queries easier to construct?	12
How do I place comments in a query?	18
How do I create default column headings for reports?	20
How do I run multiple reports without format changes interfering?	21
<i>SQL*PLUS Environment</i>	22
How do I change the SQL prompt?	22
How do I ensure a consistent look to the SQL*PLUS environment?	24
<i>Executing Queries</i>	28
How do I pass values to a query?	28
Chapter 2: Building Blocks	35
<i>Single Commands</i>	36
How do I concatenate a suffix to a substitution variable?	36
How do I use a valid ampersand in a query?	37
How do I reset substitution variables?	38
How do I double-space a report?	39
How do I sort on a data column but not print it in the report?	40
How do I eliminate blank lines from a report?	41
How do I use a valid single quote in a query?	42
How do I suppress the printing of redundant information?	44
How do I run two queries to produce one report?	46
How do I force a formfeed in a report?	48

<i>Coordinated Commands</i>	50
How do I customize runtime prompts for user variables?	50
How can I use runtime user responses to retrieve other information?	52
How do I compress columns to fit the report linesize?	54
How can I display a value instead of a NULL in a report?	60
How can I easily format query output as an ASCII flat file?	62
How do I format a report for output to an HP LaserJet printer?	64
How do I sequence pages numbers across multiple reports?	68
How can I put the value of a bind variable into a report title?	70
Chapter 3: Functions	73
<i>Dates</i>	74
How do I determine if a date occurred on a Monday?	74
How do I create begin-end date ranges from a series of begin dates?	75
How do I calculate age based on SYSDATE and a birth date?	76
How do I specify a date value in the year 2000 or later?	77
How do I return all rows where a column equals a specified date?	80
How do I compute duration based on begin and end dates?	82
How do I get counts by week?	84
How do I get a due date that is x business days after an end date?	86
How do I determine due dates and account for holidays?	90
<i>DECODE Function</i>	92
How can I use DECODE with a greater than (>) operator?	92
How do I recode numeric data into categories for frequency reports?	95
<i>Other Functions</i>	97
How do I left-justify numeric data?	97
How do I get COUNT(*) to return a zero?	99
How do I remove control characters embedded in data values?	100
How do I determine if character data values are positive integers?	102
How do I prevent inaccurate totals when summing rounded values?	104
Chapter 4: Select Command	107
<i>SELECT Clause</i>	108
How do I display all data columns in a table and the ROWID?	108
<i>WHERE Clause</i>	109
How do I create an address hierarchy?	109
How do I create an address hierarchy (continued)?	115

GROUP BY <i>Clause</i>	116
How do I GROUP BY a date?.....	116
When does a GROUP BY also ORDER BY?	118
ORDER BY <i>Clause</i>	121
How do I ORDER BY when the sort key is too long?	121
How do I get an EBCDIC sort?.....	122
How can I sort query results based on a user's runtime preference?.....	124
How do I sort the UNION of two queries?	126
How do I sort by sequence instead of numeric order?	128
How can I do a sorted INSERT?	130
Chapter 5: Special Problems.....	135
<i>Hierarchies</i>	136
How do I sort a hierarchical query?.....	136
How do I select only the leaves in hierarchical data?	140
How can I do a bottom-up hierarchical query?.....	142
NULL <i>Values</i>	144
How do I use != with NULL values?	144
How do I count NULL values?.....	146
<i>Subqueries</i>	148
How do I get a maximum value for each population item?.....	148
Are there alternatives to correlated subqueries?	152
<i>Set Operations</i>	154
Is there a join structure equivalent to UNION?	154
<i>Outer Joins</i>	156
How do I prevent population loss when using outer joins?.....	156
How can I do an outer join to a subquery?	159
How can I do an outer join with an IN or OR?.....	163
LONG <i>Datatypes</i>	168
How do I format a LONG column for display?.....	168
DISTINCT <i>Keyword</i>	170
How do I display only those rows where one data column is distinct?.....	170
Chapter 6: Reports	173
<i>Major Types</i>	174
How can I do a frequency distribution report?	174

How do I include code descriptions in a frequency distribution report?	176
How can I do a cross-tabulation report?.....	178
How do I prepare a traditional cross-tabulated report?.....	180
How can I do a cross-tabulation of sums?	184
How do I prepare a traditional cross-tabulation of sums?.....	185
How do I block a report?	186
How can I block only part of a report?	188
How can I do a report on a preprinted form?	190
How can I do a master-detail report?	192
How can I do a running total report?.....	194
How can I do a percentage distribution report?	199
How can I do a top N report?	202
<i>Formatting</i>	206
How do I build custom headers when headers must be set off?	206
How do I get rid of blank lines in blocked reports?	208
<i>External Applications</i>	212
How do I construct an ASCII file for mail merges?	212
How do I prepare a fixed-format flat file?	214
Chapter 7: Utilities	217
<i>Debugging</i>	218
How do I identify join problems?.....	218
How do I find rows that fell through a join?	222
How do I find rows that multiplied through a join?	226
<i>DBA Tools</i>	228
How do I find foreign key violations?	228
How do I find duplicates in a table?	230
Chapter 8: Statistics	233
<i>Samples</i>	234
How do I select the Nth row from a query?	234
How do I select the Nth row from sorted data?	236
How can I draw a systematic sample?	238
How do I randomly sample rows?.....	240
<i>Constructed Functions</i>	244
How do I find the median?	244
How do I find the mode?	249

Chapter 9: Performance	253
<i>Functionally Equivalent Alternatives.....</i>	<i>254</i>
Which method of computing due dates is faster?.....	254
Which method of recoding numeric data is faster?.....	256
Which method of returning an address hierarchy is faster?	258
Is a correlated subquery or a PL/SQL function faster?.....	260
Which method of doing an outer join to a subquery is fastest?.....	262
Which method equivalent to an outer join with OR or IN is fastest?.....	265
Which method of constructing a traditional cross-tabulation is faster?	268
Which method of reporting running totals is faster?	270
Which method of preparing percentage distributions is faster?	272
Which method of preparing a top N report is faster?	274
Which method of finding foreign key violations is fastest?	276
Which method of finding rows that multiply through a join is fastest?	279
Which method of sampling the Nth row from a query is faster?.....	282
Which method of systematically sampling is faster?.....	284
Which method of determining the median is faster?	286
Which method of determining the mode is faster?	288
Chapter 10: Interesting Queries	291
How can I write a query functionally equivalent to a NOT DISTINCT?	292
How can I get a frequency distribution by a time interval?	294
How can I cross-tabulate dates by week and day of the week?	298
How can I count items across two tables?	300
How do I select distinct combinations of two objects from N objects?	302
How do I find the maximum number of contacts any one customer has?....	304
How do I improve the performance of a query?.....	307
Appendix A: SQL Scripts	313
References	331
Index.....	333
